## FATHER OF PRINTING

Johannes Gensfleisch zur Laden zum Gutenberg (1393–1406 – 3 February 1468) was a German inventor and craftsman who introduced letterpress printing to Europe with his movable-type printing press. His work led to an information revolution and the unprecedented mass-spread of literature throughout Europe. It also had a direct impact on the development of the Renaissance, Reformation and humanist movement.

His many contributions to printing include the invention of a process for mass-producing movable type; the use of oil-based ink for printing books; adjustable molds; mechanical movable type; and the use of a wooden printing press similar to the agricultural screw presses of the period.

Johannes Gutenberg

Early wooden printing press, depicted in 1568. Such presses could produce up to 240 impressions per hour.

Described as the "man of the millennium", Gutenberg is often cited as among the most influential figures in human history. He has been commemorated around the world and is a frequent namesake. To celebrate the 400th anniversary of his death in 1900, the Gutenberg Museum was founded in his hometown of Mainz.
